ADRIANA STĘPIEŃ

Software Prod and Plat Eng Specialist, Level 9

P&PES (ATC)
POLAND

PROFESSIONAL BACKGROUND

Senior Software Developer with over seven years of experience delivering business-critical software solutions in close cooperation with clients. For the past three years, a key contributor to the primary network and data platform for European wholesale energy markets, working on complex, data-driven application supporting trading and operational processes.

Recognized as a reliable and impactful team member, able to collaborate effectively across teams and disciplines. Strongly focused on application development, translating complex business requirements into stable, maintainable, and user-friendly solutions. Actively contributing to system design and technical decision-making. Experienced in Agile delivery environments and cross-team coordination on large-scale projects.

PROJECT EXPERIENCE

Client: Energy Markets Platform *(08.2022-12.2025)*

Short project data: *Agile delivery; 20-member team; AM team; nearshore delivery model*

Role description & responsibilities:

Developed and maintained a desktop application supporting energy trading operations within a large-scale European data platform. Implemented complex business logic and data handling mechanisms, ensuring reliability, performance, and usability. Contributed to cross-team problem solving to ensure timely delivery of high-quality features. Supported quality assurance through automated and component-level testing.

Technologies: *C#, F#, WPF, PowerShell*

Client: Cloud and Platform Development *(06.2022-08.2022)*

Short project data: *Agile delivery; 20-member team; AM team; nearshore delivery model.*

Role description & responsibilities:

Contributed to the development of a web application for internal skill and resource management, built on a three-layer architecture. Implemented the business logic and data access layers with SQL Server integration and collaborated on the presentation layer to deliver an intuitive and user-friendly interface using Angular.

Technologies: *C#, Angular, Entity Framework, ASP.NET API, SQL Server*

Client: Test & Measurement / Industrial Systems *(08.2021-09.2021)*

Short project data: *Waterfall delivery, 3-member size team, AM team*

Role description & responsibilities:

Completed an advanced backend development training project covering Python, relational databases, and web application development. Gained hands-on experience with intermediate and advanced Python concepts, including object-oriented programming, error handling, data processing, and working with external libraries. Developed practical applications using Flask and Django, including database-driven web applications and REST APIs.

Technologies: *LabVIEW*

FUNCTIONAL/ TECHNICAL SKILLS

- *.NET / C#*
- *WPF*
- *REST APIs*
- *Entity Framework*
- *Testing pyramid*
- *SOLID Principles*
- *Data: MS SQL Server, SQLite*
- *Process: Agile, Scrum*
- *Industrial & Measurement Systems*

CERTIFICATES

- *M.Sc. Biomedical Engineering*
- *Python Developer Bootcamp*
- *Certified LabVIEW Developer*
- *Take OFF Inside Sales*

ADVANCED TECHNOLOGY CENTER POLAND

STAFFING GUIDELINES

ATC POLAND FY24

BOOKING TO PROJECTS

- **General rule = first come, first serve**
- **Sold work goes prior to not-sold / proposal work**
- Respect for the individual, with focus on capability and/or strengthening our people's industry skills

EXCEPTIONS

- Exceptions to the ATC Poland Staffing Guidelines need to be explicitly agreed between the project and:
  - Marcin Miller for ATC Lodz
  - Piotr Koszek for ATC Katowice
  - Pawel Baran for ATC Warsaw
  - Adam Grzelewski for ATC Virtual

CREATE ROLE

- **Project** is responsible for creating roles in myScheduling.

PROPOSE CANDIDATES

- Proposals are **non-biding**, explicit requests to softlock or hardlock are required.

SOFTLOCK

- Request to softlock need to be **explicit.**
- A candidate can be softbooked to more than one project.
- A conversation between the project and the candidate is recommended before granting a softlock.
- If another project expresses interest in the resource, the Client Team which made the original softlock is informed about the situation and **can hard-lock the resource within 1 business day.**

HARDLOCK

- Used to confirm the candidate to the project.
- Possible only when chargeable WBS is provided.
- **The project immediately starts incurring the resource's loaded cost and all related charges.**
- **Following details are required**: Client, Project & Project Manager, Start date & End date, Role ID (myScheduling) & WBS
- **In case of project cancellation or resource reduction**, if the resource was hard-locked then it **will be charged to the project WBS**.
- If a resource has been recruited specifically for the project, the **project is responsible for the resource until re-staffed** – up to a maximum of **three months**.
- If the resource was allocated from the bench, the **two-week charge** from the cancellation date applies.

EXTENSION

- **No automatic extensions exist.**
- Priority is normally given to the current project, but the resource can be prioritized to other roles.

ROLL-OFF

- **Projects will be charged for the notice period worth of time** for unscheduled roll-offs unless the resource can be immediately re-staffed onto another (chargeable) project.
- All roll offs should be communicated to the **OrgUnit Lead** and to **Talent Planning Team** at least: **2 weeks** (for 3 or less rolled-off resources)/ **8 weeks** (for more than 3 rolled-off resources or all resources on **with long-term rates**) prior to the scheduled roll off date.

Costing&Pricing in ATC Poland

*Please **contact ATC Poland Solution Architecture** team (**Poland.ATC.SA**) to obtain the information on:*

- *Appropriate BCs and LCRs in ATC Poland*
